

Connect Cloze from your Canva account

1. Sign in on desktop browser

- Open Canva in a web browser and log in.
- In another tab, log in to Cloze too (this helps the authorization step go smoothly).

2. Open any Canva design

- From your Canva Home, open an existing design (or create a new one).

3. Open the Apps panel

- In the left sidebar inside the editor, click **Apps**.

4. Find Cloze

- Search for **Cloze** and select it.

5. Open the Cloze app

- Click **Open**.

6. Connect

- Click **Connect**.

7. Approve permissions

- A Cloze authorization screen will pop up. Confirm it's the right account, then click **Allow/Approve** to finish linking.

Once connected, you should be able to pull Cloze content into Canva designs (for example, listing photos/details) directly from the Cloze app panel.
